

PHISHING AWARENESS TRAINING

Secure Your Digital Identity | CodeAlpha Internship Task 2

What is Phishing?

Phishing is a deceptive technique used by cybercriminals to trick individuals into revealing sensitive information, such as login credentials, financial details, or personal data.

| THE MASSIVE SCALE OF PHISHING

3.4B

Phishing Emails Sent Daily

Over 90% of cyberattacks begin with a phishing email. It remains the #1 entry point for ransomware and data breaches globally.

 Digital cybersecurity threat visualization

TACTICS OF SOCIAL ENGINEERING

Pretexting

Creating a fabricated scenario to earn your trust before asking for data.

Baiting

Using a "hook"—like a free download—to entice you to click a link.

Quid Pro Quo

An exchange of information for a service (e.g., fake IT support).

| THE ANATOMY OF A FAKE EMAIL

Common Red Flags

- ⚠ **S - Sender:** Mismatched or spoofed addresses.
- 🔗 **L - Links:** Suspicious URLs (hover to check).
- 📎 **A - Attachments:** Unexpected invoices or .exe files.
- 🕒 **M - Message:** Excessive urgency or threats.

 Visualizing cybersecurity threats

SPOTTING FAKE WEBSITES

Attackers clone login pages for Microsoft, Google, and Banks to harvest credentials.

Visual Checklist:

- Check the URL: "microsoft-support.net" vs "microsoft.com"
- Look for SSL: Missing padlock icon or broken HTTPS.
- Quality: Low-resolution logos or obvious spelling errors.

| THE AI-POWERED SURGE

AI-generated phishing emails have a 60% higher click rate than traditional scams due to perfect grammar and personalization.

Traditional Phishing

18% Click Rate

Method	Value
Traditional Phishing	18% Click Rate
AI-Personalized	53% Click Rate
Quishing (QR Code)	400% Rise in 2024

Interactive Quiz Section

Test your knowledge and stay sharp!

| QUIZ QUESTION 1

Which of these is a major phishing sign?

A

Official company email
address

B (Answer)

Urgent request for
passwords or data

C

Secure HTTPS website with
valid SSL

QUIZ QUESTION 2

What should you do before clicking a link?

A

Click immediately to save time

B (Answer)

Hover to inspect the destination URL

C

Ignore all browser security warnings

| PHISHING-RESISTANT BEST PRACTICES

-  **Enable MFA:** Use Phishing-Resistant Multi-Factor Authentication.
-  **Hover Before Clicking:** Always inspect the destination URL of any link.
-  **Report Immediately:** Use your organization's "Report Phishing" button.
-  **Trust No Unsolicited Calls:** Verify through official channels.

COMPARATIVE ANALYSIS

Feature	Legitimate Communication	Phishing Attempt
Sender Address	official@company.com	official@company-support.net
Salutation	Personalized (Dear John)	Generic (Dear Customer)
Action	Informational	Urgent / Immediate

Stay Vigilant. Stay Secure.
